Lake Como Villa

Italian Gothic Villa

4601 E. Ocotillo Road, Paradise Valley, AZ

Reminiscent of a 14th century Gothic Italian Villa, this magnificent estate is nestled in a very private Paradise Valley neighborhood, with panoramic views of Camelback Mountain. It has an incredible formal master wing that features a study/library and world class theatre room. The Gothic Italian kitchen showcases Sub Zero and Viking appliances, and limestone and granite counters. The owner of this home will also enjoy a central entertainment bar, stone wine cellar, and a four-car garage.

7,178 sq. ft. liveable, 9,248 under roof, includes a 1 bedroom guest house

Lake Como, during the 12th century, was developed by nobility. They created beautiful villas in a style that is now referred to as Romanesque-Lombardian architecture, which focused on profound intricacy.

This BedBrock home emulates Lake Como's gothic architecture, with antique distressed timber beams, imported Italian travertine and groin vault ceilings. Other features include custom hand-carved cabinetry, and antique sandstone fireplace mantels.
